# Safety Monitoring

**Directions** Use the steps below to conduct an audit of a street in your neighborhood. Use your findings to propose a way or ways to make streets safer.

- ◆ **Pick a location.** Which areas in your neighborhood have high foot traffic or bike traffic? Identify an area you'd like to survey.
- ◆ **Map the road.** Use Google Maps to highlight your area of interest and the surrounding streets. You may print the map or sketch it on the back of this sheet.
- ◆ **Create a key.** Using the street view on Google Maps, identify features of the area from the list below. Add these to your map, and create a key for the symbols that you use.

Signs

Speed limits

Sidewalks

Crossing guards

Other

- ◆ **Survey the area (optional).** If there's time, take a walk around the area to look for features you might have missed. Identify any damaged roads or sidewalks, and take note of high-traffic areas.
- ◆ **Report.** Use the lines below to summarize your findings. Come up with a proposal for how to make the area more safe. Consider how you can be involved in making change.
